DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-5, 20-21, 35-39, 54-55, 69-73, 88-89, drawn to a gateway bridging between networks for transmitting data, classified in class 370, subclass 401.
- II. Claims 6-19, 22-24, 25-30, 33-34, 40-52, 56-58, 59-64, 67-68, 74-87, 90-92, 93-98, 101-105, drawn to determining the usage cost for a particular telephone set or the cost to a subscriber wherein a service provider utilizes a computer software or program in determining the cost of a telephone service provided to a subscriber, classified in class 370, subclass 352.
- III. Claims 31, 65, 99 drawn to ordering routes by checking the quality of service of a route and cost estimate of a route, classified in class 709, subclass 239.

- IV. Claims 32, 66, 100, drawn to prioritizing routes by determining a reduced route and comparing a requested route with the reduced route, classified in class 370, subclass 238.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I is drawn to a gateway for connecting between different networks to transfer voice over packet-switched network. The subcombination has separate utility such as invention II is drawn to determining the usage cost for a particular telephone set or the cost to a subscriber wherein a service provider utilizes a computer software or program

in determining the cost of a telephone service provided to a subscriber, i.e., “an application layer includes application services”(claim 6) for “determining the cost to apply to each call”(claim 11); invention III is drawn to ordering routes by “checking the quality of service of a route and cost estimate of a route”(claim 31); invention IV is drawn to prioritizing routes by “determining a reduced route and comparing a requested route with the reduced route”(claim 32).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Michael Messinger on 9/13/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuongchau Ba Nguyen whose telephone number is 703-305-0093. The examiner can normally be reached on Monday-Friday from 10:00 a.m. to 3:00 p.m..
